

# 100/200 Box

Choose four of these digits above.  
Each one must be different.  
Put one digit in each box.

This makes a pair of two-digit numbers reading across and another pair of two-digit numbers reading down.

In this example the total is 83.

$$12 + 34 + 13 + 24 = 83$$

1	2
3	4

How many different ways of making 100 can you find?
