Aisha's brother went to the cash machine.
He drew out the same amount of money
as he had in his pocket.
He then spent £40 on a meal.

He went back to the cash machine.
He drew the same amount of money as he
had in his pocket.
He then spent a further £40 on a new
pair of trainers.

He did this a third time. He spent a further
£40 and he then had no money left.

How much money did he have at the start?
