

Try it!

1. Continue the pattern:

4, 8, 12, __, __, __, __, __

8, 16, 24, __, __, __, __, __

50, 100, 150, 200, __, __, __, __

100, 200, 300, 400, __, __, __, __

2. Fill in the missing numbers:

100 150 250

100 400

3. Aisha wrote down multiples of 4, starting from 40. Find her mistakes:

40, 44, 48, 50, 56, 60, 62, 68, 72

- What should she have written?

Apply it!

1. What numbers on the number line are the letters A, B and C pointing to?

2. Luca has dropped his money. He had six 50 pence coins and eight £1 coins. How much money has Luca dropped?

3. There are grapes on a bunch.

How many bunches does Josh need if he wants to buy grapes?

Complete 5 examples of this question using 4, 8, 50 and 100 grapes on a bunch.

Fly with it!

1. Circle the odd one out.

100, 150, 200, 275, 300

Can you explain your strategy?

2. True or false?

If I count in 50s from zero to 500, all the numbers will be even. Prove it!

3. Roman said,

“All multiples of 100 are multiples of 50.”

- Is he right? Why?

Luca continued, *“In that case, all multiples of 50 are multiples of 100”.*

- Is Luca right? Explain your answer.
