

Try it!

1. Find the missing numbers in these sequences:

5, 4, 3, 2, ____, ____, ____, ____

____, ____, ____, ____, -6, -8, -10, -12

12, 7, 2, ____, ____, ____, ____

2. It was 4° outside in the evening. During the night, the temperature fell by 10°. What is the new temperature?

3. What temperature is 9° higher than -3°?

Apply it!

1. Draw the new temperature on the thermometer after each change:

A. In the morning, it is 3°. It drops by 9°.

B. The next day, it warms up by 11° but then cools by 8°.

C. By the end of the week, it has risen to 25°. How much warmer did it get?

2. Using the information in the bank statement, update the balance for each transaction.

Bank Statement for Roman Senior				
Date	Item	Debit	Credit	Balance
12.2.18			£13.00	£13.00
14.2.18	Meal	£19.00		
17.2.18	Phone Bill	£14.50		
19.2.18	Store Refund		£28.00	

Fly with it!

1. Roman is counting down from 21 in 5s.

Will he say -21? Explain your answer.

2. Aisha has been given a number sequence with some missing numbers.

?	?	5	?	?	-5
---	---	---	---	---	----

She writes down her sequence as:

15	10	5	0	0	-5
----	----	---	---	---	----

Is she right? Prove it!

3. Luca is counting down in 3s from 15.

What would the third, ninth and twelfth numbers be?
