

Try it!

1. Find the missing numbers in these calculations

$$\underline{\hspace{2cm}} = 694 - 235$$

$$459 + \underline{\hspace{2cm}} = 749$$

$$\underline{\hspace{2cm}} - 374 = 197$$

2. Roman bought a large bag of cherries. Over the course of the next few days, he and his family ate 378 cherries. There were 793 left. How many cherries did Roman buy?

3. Josh has raised £56.72 for a charity. His target is £340. How much more does he need to reach his target?

Apply it!

1. Luca researched the height of two mountains. Mountain 1 was 26,789 feet above sea level. Mountain 2 was 23,954 feet above sea level. What is the difference in height between the two mountains?

2. Aisha said "The answer to my calculation is 4387." What might the equation have been?

Write three addition calculations.
Write three subtraction calculations.

3. At the start of the month there were 2498 footballs in the shop. Throughout the month, 7765 balls were delivered and 4293 balls were sold. How many balls were in the shop at the end of the month?

Fly with it!

1. Josh wrote down some equations. Are they true or false?

$$3.7 + 0.6 = 3.13$$

$$7.1 - 1.9 = 5.3$$

2. Luca and Aisha each buy a game. Luca pays with £5 and gets £2.07 change. Aisha's game cost £8. How much more does Aisha's game cost than Luca's?
